# PHOENIX
Laboratory Information System

ABOUT PHOENIX

Phoenix is a state-of-the-art Laboratory results system uniquely designed to manage your laboratory testing results in a timely manner. Our highly intuitive interface was designed to allow our laboratory professionals to enter data, and generate accurate reports. Phoenix is an LIS system that fulfills the needs of a completely functional lab utilizing equipment and software integration, bar coding, online reporting and chain of custody documentation. Our secure LIS system reduces errors while protecting confidential patient information.
