

REAL-TIME PCR TESTING

DTPM
MOLECULAR

The QuantStudio 5 Real-Time PCR System is the latest state-of-the-art system for Human Identification. The instrument provides users with an easy-to-use, reliable, and affordable PCR system that provides accurate and trusted results.

REAL-TIME PCR APPLICATIONS

Real-time PCR is a flexible technique that can be used for multiple forensic applications:

- Molecular testing
- Quality and quantity sample assessment

INNOVATIVE INSTRUMENT FEATURES

- Smaller foot print: 27 W x 50 D x 40 H cm, designed to maximize horizontal and vertical bench space
- Front-facing fully motorized block
- Simplistic Instrument functionality
- Easy and intuitive touch screen interface enables viewing of amplification plots
- Precise temperature control with Peltier-controlled blocks (known as VeriFlex zones)
