

# TOXICOLOGY TESTING EQUIPMENT AND SERVICES

DTPM

DTPM is an expert leader in laboratory setup and management specializing in the toxicology testing industry. We work with labs of all sizes to help guide them through the process of setting up, running, and maintaining a toxicology laboratory. DTPM also offers a wide selection of state-of-the-art analyzers that perform at the highest level of accuracy and speed.

## OLYMPUS AU SERIES

*FLOOR MODEL ANALYZERS FOR HIGH VOLUME LABORATORIES*

- State-of-the-art analyzer for toxicology screening and is utilized in various laboratory settings including reference labs, treatment centers and recovery courts
- Provides one of the fastest options for your testing needs with the ability to process up to 6,600 tests per hour
- With 10 patient samples per rack, the instrument can run up to 100 reagent and validity samples at a time and increase your laboratory's testing capabilities

## THERMOFISHER INDIKO™ PLUS

*DESKTOP MODEL ANALYZERS FOR LOW TO MEDIUM VOLUME LABORATORIES*

- Trusted industry manufactured and fully automated state-of-the-art chemistry analyzer designed for all laboratory settings including small to medium settings
- User-friendly automated system with quick and simple daily start-up and maintenance procedures with versatile features to make sample processing easier
- The continuous feed attribute allows for more than 180 tests per hour without interruptions making it one of the most powerful and efficient desktop analyzers on the market
